

YUSUF SUBASHI

Software Engineering Student | Web Developer | Startup Co-Founder

Tashkent, Uzbekistan • +998 90 906 95 63 • ysf.subasi09@gmail.com

SUMMARY

Second-year Software Engineering student with real, shipped work: 7 production websites delivered for agency clients and a live marketplace startup, P2W-Shop, co-founded and led since 2024. Uses AI-assisted development (Claude, Lovable) to build and launch quickly, while strengthening programming fundamentals in Python, Java and JavaScript. Outgoing and proactive; comfortable working with clients and teams in English, Russian, Turkish and Uzbek. Seeking a software engineering internship to learn from experienced engineers and contribute from day one.

EXPERIENCE

Co-Founder & CEO — P2W-Shop

2024 – Present

Marketplace for gaming and digital goods • Telegram bot + website • p2w-shop.com

- Co-founded and lead a marketplace where users buy and sell in-game items, accounts and digital services, with listings from \$1 to \$10,000.
- Built the platform together with a co-founder using AI-assisted development: a shared product catalog with moderator review, an escrow (guarantee) bot that holds payment until delivery, and a scam-check database to verify users by ID or username.
- Designed the business model (8% commission) and a simple 4-step seller onboarding flow; personally set up the domain, hosting and deployment.
- Own product decisions, user support and community growth.

IT Specialist / Web Developer — OCA – Outreach Craft Agency

2024 – 2025

Digital marketing agency • Tashkent

- Built and launched **7 client websites** end-to-end, from first brief to live domain, for businesses in Uzbekistan and abroad, using Claude and Lovable for AI-assisted development.
- Covered a range of industries: outdoor-advertising manufacturing (online order calculator, Russian/Uzbek versions), logistics education, wholesale cosmetics distribution, local SEO services and the agency's own website.
- Handled the full launch cycle: domain setup, hosting, deployment, mobile-responsive layout, SEO meta tags and social-media link previews.
- Turned client requirements into working pages and iterated quickly on feedback together with the marketing team.

Portfolio: parusbayroq.uz • loadmasters.org • glorystore.uz • localblock.agency • oca-x.agency • almatari-enterprises.org • p2w-shop.com

Graphic Designer (Seasonal) — Willmoda

Summers 2022, 2023, 2026

Textile company

- Created visual designs for textile products and marketing materials during three summer placements.
- Invited back for three seasons, working to production deadlines alongside the design and production teams.
